## **COVID-19 Safe Plan Winter 2022**

**Issued:26/3/2022**

*Note: This plan is subject to changes resulting from government changes in mandatory requirements and recommended practices*

### **Use and Occupation of the Lodge**

The Club's fundamental approach is the safety of our members, their guests and management.

#### **General requirements**

There are numerous resources issued by government in relation to the COVID-19 pandemic including general hygiene and individual protection. In this regard:

- Practice good hygiene (see websites below).
- Cover your mouth when coughing and sneezing.
- Wash your hands with soap and water.
- Wash down surfaces.
- Use alcohol-based hand sanitisers.
- If you are sick stay home (self-isolate).
- Social distancing - stay home, avoid large gatherings if they are not essential.
- Minimise physical contact - keep 1.5 m away from others except from the same household, family or group skiing together who consent to being in closer proximity.

The Club wishes to direct members to the following resources for more information:

<https://www.health.gov.au/news/health-alerts/novel-coronavirus-2019-ncov-health-alert>

<https://www.safeworkaustralia.gov.au/COVID-19-information-workplaces>

<https://www.who.int/emergencies/diseases/novel-coronavirus-2019/advice-for-public>

There will be sanitising stations installed at the entrance to the Lodge and the entrance to the lounge/dining area and on the servery. Members are encouraged to use hand sanitisers frequently.

Members are also encouraged to bring and use their own hand sanitiser outside of the public areas of the Lodge.

## **Restrictions on attendance at the lodge**

A member or guests will not be permitted to attend the lodge if:

- He or she is or has been infected with COVID-19 and has not recovered and be proven to be clear of the infection (i.e. COVID-19 test negative).
- He or she has been or has returned from overseas immediately prior to visiting the Lodge and has not been through the required quarantine isolation period and has not tested negative for COVID-19.
- He or she is subject to a quarantine notice, self-isolation notice or similar.
- He or she is a close contact with a known infected person and has not tested negative for COVID-19 after the expiration of the incubation period (nominally 7 days).
- He or she is unwell and/or is showing symptoms of COVID-19 and has not tested negative or those test results are not yet available.

## **Occupation of the Lodge**

Government restrictions and guidelines may change over winter season 2022.

The Club has decided that, subject to modifications to accommodate any such changes, the use of the Lodge during winter season 2022 will be:

- Lodge Management may require any or all guests to undertake a Rapid Antigen Test.
- There will be a greater focus on continuous cleaning and hygiene.
- There will be requirements in the event that a member or guest is infected by COVID-19 previously or whilst at the Lodge, or if they display COVID-19 like symptoms.

Additional information for each of these is set out below.

## **Numbers using the Lodge**

The Club is licensed to accommodate no more than 22 members and guests at any one time in normal operating circumstances. On that basis, all 10 rooms will be available for use by members and guests.

The Club has determined that each room will be restricted to single occupancy unless those sharing the room are from the same household, family or group skiing together and consent to being co-accommodated.

Lodge Management may require that guests undertake a Rapid Antigen Test on arrival or at any time.

## **Restrictions on use of Internal Spaces**

A number of advisories will be implemented, including the following:

- Members and guests are encouraged to keep separate their own items, such as bottles and fruit and cheese etc in the bar fridges.
- There will be signs in each room notifying as to the maximum number that room can accommodate, notifying of restrictions in the use of that area and encouraging good hygiene practices.
- We will encourage members and guests to help by maintaining personal hygiene and physical distancing requirements.

## **Lodge cleaning and related**

Lodge Management will conduct cleaning of the Lodge both between weekly bookings as well as certain daily cleaning, including following:

### *Weekly or other room change-over*

- Washing of all pillow cases, sheets, blankets, towels and doona covers at higher temperatures than normal.
- Higher intensity cleaning of areas on change-over such as guest bathrooms, all hard surfaces, including tables, door handles, window winders and seating etc.

### *Daily*

- Sanitising of all frequently touched surfaces regularly,

## **Actions in the event of a COVID-19 contamination in the Lodge**

- If Lodge Management is of the view that a member, guest, manager or their family at the Lodge has symptoms of COVID-19, but the infection is not yet confirmed or otherwise—
    - Lodge Management will use temperature checking devices to test a member's, guest's or manager's temperature.
    - Lodge Management will contact a Board member, detailing the symptoms observed, including the temperature recorded. The Board member will discuss the situation with the apparently infected person or, if a apparently infected person is a minor, with their parent or guardian.
    - If the Board member is of the view that it is necessary, the apparently infected person will be required to have a COVID-19 test without delay and to self-isolate in a bedroom until such time as the COVID-19 test is confirmed. If that person is a minor their parent or guardian will be responsible for the care of that minor and that parent/guardian will also be isolated.
    - Should the apparently infected person or, as is applicable, their parent or guardian, decide not to have that test and/or to self-isolate, the apparently infected person must leave the lodge immediately.
  - If a person staying in or visiting the Lodge has or contracts COVID-19 while at the Lodge or tests positive to COVID-19 within 48 hours after staying or visiting the Lodge, the following process will be undertaken subject to any modifications where the infected person has already left the Lodge premises:
    - The infected person will self-isolate at suitable premises.
    - The Lodge will be shut down as rapidly as possible and all occupants will be required to vacate the premises. All occupants will be advised to self-isolate and undergo testing.
    - The Department of Health will be advised of the infection and the Club will follow any direction issued by the Department or their delegate.
    - The NPWS will be advised of the infection and the Club will follow any direction issued by the Service or their delegate.
    - The Club will organise appropriate cleaning of the Lodge.
    - No subsequent occupation will be permitted until such cleaning is complete.
-
